

## **Heat Pump Unit Installation Contract** **Full Metal Shovel, Inc.**

*Rec Warehouse approves the above-named state certified contractor to provide the basic plumbing installation for \$325.*

### **Basic Plumbing Installation Includes:**

- Delivery of unit within 30 miles of purchase location (\$1 per mile one-way over 30 miles)
- Placement of unit on existing slab
- Plumbing to existing pool equipment within 3 feet
- Installation of external by-pass
- Installation of chemical loop and check-valve (if there is an existing in-line chlorinator)

### **Optional/Additional Installation Work:**

- Installation of prefabricated concrete slab-\$50
- Installation of patio-stone foundation-\$30
- Removal of existing units-\$100
- Installation of in-line chlorinator-\$100
- Major plumbing changes involving waterfalls, solar heating systems, pool/spa combinations, and/or dual motors. Please ask contractor for an estimate.

### **Customer Responsibilities:**

- A 5 foot by 5 foot unobstructed installation site
- Removal of any existing fences, trees, shrubs, sprinklers, and/or any other obstacles preventing access to or located in the heat pump installation site. (Removal by contractor will be an additional cost.)
- Disconnecting gas lines of existing gas heaters
- NO ELECTRICAL WORK IS INCLUDED. Please contact a licensed electrician to preform the required electrical hook-up.
- \*Arrangements should be made for the electrician to arrive after the heat pump unit is plumbed.

I have read the installation contract and I understand and accept the conditions set forth and my responsibilities.
